

Limes and <inputs>

As I mentioned, there are many similarities between a lime and the `<input>` element!

Here is a simple infographic to help you remember.

I'm so excited for this section.

Stay motivated and see you in the next lecture.

LIME

<input>

It's a simple fruit

It's a simple
HTML element

We can apply
many recipes to it

We can apply many
different type
attributes to it

It can produce
many different
things

It can produce
many different
types of widgets
